Services and Solutions for the U.S. Federal Government

Helping achieve your mission through focused capabilities and deep government expertise

The federal government faces unprecedented pressures. From mounting program costs due to an aging population and new security requirements to a vacuum of knowledge left by a vast retiring workforce, departments and agencies are challenged to operate in a world characterized by change. Future success requires departments and agencies to leverage innovative business processes and technologies that transform operations for the future while meeting the process and technology demands of today.

At CGI Federal, we understand the transformation that must take place to respond to these pressures. With more than 30 years of federal government experience, we have the industry knowledge and best practices needed to plan, design, implement and manage highly effective and efficient federal government environments—allowing departments and agencies to better serve the American people with fewer resources.

Contracting vehicles

Through the Government-Wide Acquisition Contracts (GWACs) and General Service Administration Federal Supply Schedules (FSSs) that have been awarded to CGI Federal, agencies have access to a wide range of services that can be made available quickly and with minimum paperwork under time-and-material, firm fixed-price or cost-option contracts. Depending on your needs, we can offer services under the following contracts:

- GSA IT Schedule 70
- GSA MOBIS
- DOJ Information Technology Support Services (ITSS-3)
- IRS Total Information Processing Support Services (TIPSS-3)
- GSA Environmental Services Schedule

Transforming the business of government

A partner of choice

CGI Federal is a full service IT and managed services provider with focused industry expertise and innovative service models that help clients achieve their business goals. With more than 35 years of experience, we've partnered with a majority of U.S. federal government agencies, including 18 of the 24 CFO Act agencies, 23 independent agencies and government corporations and 32 boards, committees and commissions. We've also partnered with more than 90 agencies to deliver strategic financial management solutions.

CGI Federal clients gain the advantage of technical expertise coupled with extensive government consulting experience. Our industry capabilities and know-how make us an ideal partner to not only deliver the systems government needs, but to provide program thought leadership and process improvements.

Client-centered delivery approach

With CGI Federal, you can be certain that we put our clients first. CGI Federal customizes each client engagement to deliver targeted services and solutions that can be implemented quickly to meet your agency's specific business goals. We also follow a rigorous ISO 9001-certified client management framework, which measures performance throughout an engagement's lifecycle and fuels our track record of consistent, high-quality delivery.

Our professionals have strong industry backgrounds—many having worked in the federal government environment for years—and have expertise in both the business and technology sides of your business. To each engagement, our consultants bring a passion for excellence and innovation and an unwavering commitment to client satisfaction—success is meeting clients' business goals, not ours.

Full-service capabilities

Systems integration and consulting

We help plan, design and implement business and technology solutions that fulfill agencies' strategic priorities. CGI Federal acts as a trusted advisor, providing a full range of consulting services—such as transformation planning, intellectual capital management, security and privacy—as well as systems architecture and integration services.

Application management

CGI Federal provides day-to-day maintenance and improvement for agencies' business applications, helping reduce costs and ensure faster delivery of new initiatives. Services include application development, enhancements, maintenance, testing and support. We also provide custom solution design and delivery.

Technology management

We have full IT infrastructure management capabilities, allowing agencies to delegate entire or partial responsibility for their IT functions. Our technology management services offer a standards-based set of service components, delivered packaged or a la carte, to provide tailored services that meet each department and agency's specific requirements.

Business process services

CGI Federal offers subject matter expertise and services to augment federal agency staff in the planning, execution and management of core business functions. By working with an experienced partner that combines industry expertise with strong business process capabilities, government departments and agencies can lower costs, improve execution and focus on performance.
